## **Response to Arguments**

- Applicant's arguments, see page 4, lines 1-29, filed 10 February 2006, with respect to 1-4 and 10-11 have been fully considered and are persuasive. The rejection of these claims has been withdrawn.

## **REASONS FOR ALLOWANCE**

- The following is an examiner's statement of reasons for allowance:  
  
The present invention is directed towards a method and system of segmentation of images by thresholding. The closest prior art, Gahang (USPN 5,838,463), shows a similar system, in which, a threshold generator for generating a threshold value corresponding to each input pixel of image data, wherein an image processor for

correcting shading and emphasizing edge of said image data to produce processed data having said shading corrected and edge emphasized on a line-by-line basis, and a binarizing circuit for using half-tone processing to binarize each pixel of the processed data on a basis of said threshold value and generate binary data accurately representing the image. However, Gahang fails to address: "for selecting, for each pixel to be thresholded in the image, one threshold among a plurality of thresholds, based on the relative magnitudes of the thresholds and assigning each pixel to one of two classes according to the value of its intensity relative to the selected threshold for the pixel". This distinct feature has been added to all independent claims and render them allowable.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
